FLOOR DRAINS · SDS

SDS · Point drain with S-siphon

High-capacity point drain with sealing collar bonded to the flange and S-siphon technology.

- 25 mm water seal height, ø50, 0.80 l/s horizontal-outlet siphon
- Complete set for direct installation; min. 60 mm screed
- Patented levelling aids
- Protective and leak-test cap
- Removable hair and dirt trap

Smart features and technical drawing

Smart features

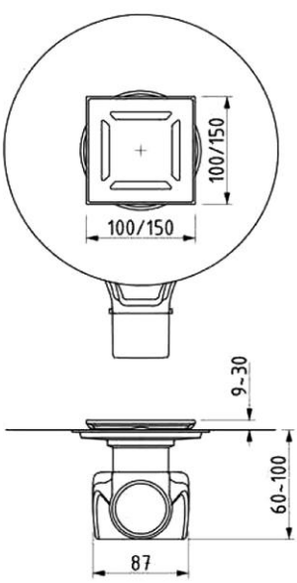

Horizontal-outlet siphon
Patented, specially designed shape.
The water flow reduces the build-up of dirt and debris inside.
Self-cleaning throughout its service life.

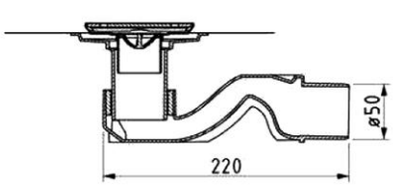

High-capacity, low-profile horizontal-outlet siphon
The 25 mm water seal height prevents odours escaping from the drain.
Its high drain capacity removes water quickly and efficiently.
Its patented self-cleaning shape reduces the build-up of hair and dirt.
The gasket built into the body **prevents leaks.**
Its minimal, compact design allows a low installation height.

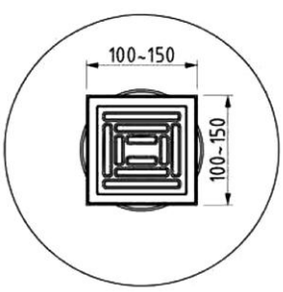

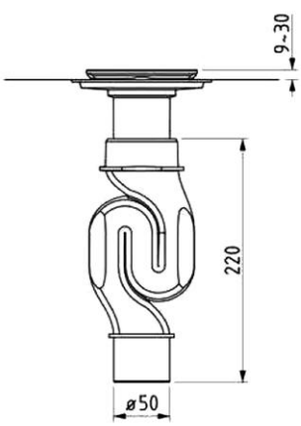

Protective and leak-test cap
Protects the sealing collar during screeding.
Allows a **water leak test** at the plumbing connection.
After screeding, the cap is removed, turned over and refitted.
Keeps dirt and mortar out of the drain body during tiling.

Fully concealed frame and grate

The grate is finished with your own tile, creating a seamless surface across the bathroom.

Easy-to-clean frame with factory-fitted sealing collar. Bond an 80 × 80 mm tile, cut to size, into the grate insert and the drain is ready to use.
