Stainless steel bathroom solutions since 1967

Founded in Istanbul in 1967, Evimetal is Türkiye's first manufacturer of stainless steel bathroom products. At its design centre, accredited by the Turkish Ministry of Industry and Technology, the company handles the entire process in-house, from product design and tooling to manufacturing.

It offers more than 100 models and over 3,000 variants of shower channels, floor drains, profiles and shower niches.

Since merging in 2021 with GRUEN, the innovative German shower drainage brand, Evimetal supplies Europe, North America, MENA, the Caucasus and Central Asia from its production plant in Türkiye and its sales offices and warehouses in Germany and the USA.

Its award-winning design and engineering team ensures compliance with international quality standards, with products certified by Kiwa abP, ICC-ES, TÜV Rheinland and CE.

PRODUCTION AND LOGISTICS

Strength born in Türkiye, delivered worldwide from Germany and the USA

● Germany

Gruen Bausysteme GmbH · Sales office and warehouse

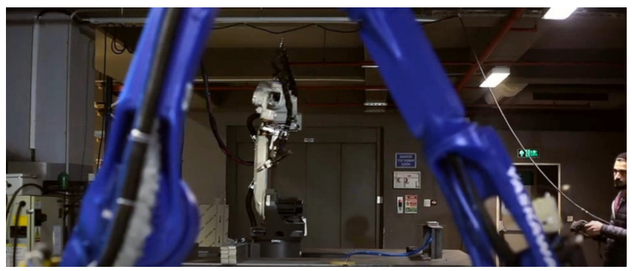

Local stock, sales and project support for the European market.

● USA

Gruen Systems LLC · Sales office and warehouse

Local stock, sales and project support for the North American market.

Design → Prototype → Production → Project support

● Türkiye · Robotic manufacturing

Evimetal factory · Robotic welding, CNC and automation

Our products are designed and manufactured at our factory in Türkiye.

Made in Türkiye.
Locally established in Germany and the USA.

04	**Equipment**	Shower glass, mirror, accessories
05	**GRUEN systems**	Drains, waterproofing, niches, profiles

PLANNING

The bathroom design is finalised during project planning, before production starts. Crane and transport access is assessed, and module dimensions and the installation schedule are defined. **We plan all these steps together with you and provide technical support at every stage of the project.** For delivery, lifting and installation steps, see p. 11.

No hassle on site. Your bathroom arrives ready.

WHO WORKS ON SITE?

The contractor coordinates six separate crews in sequence

Bricklayer | Plasterer | Plumber | Waterproofer | Tiler | Installer

One point of contact: GRUEN

Crane crew | Service connection

THE CONTRACTOR'S PROBLEM ON SITE — THE GRUEN SOLUTION

Topic	On site (conventional)	Gru-Bathroom Pod
Purchasing	✕ Lengthy, separate purchasing decisions for every product	✓ Expert design team and better purchasing terms
Time and weather	✕ Crews wait for each other; a bathroom takes weeks	✓ Parallel production at the factory; finished on site simply by connecting services
Health, safety & coordination	✕ Site safety, 6 crews, 6 schedules; one delay shifts them all	✓ One point of contact, one contract, one schedule
Waterproofing	✕ Curing time needed; defects often appear after tiling	✓ Applied and tested at the factory
Quality	✕ Depends on the installer; high touch-up and repair rate	✓ Every bathroom to the same standard, inspected before delivery
Site organisation	✕ Material stock, waste, debris, dust	✓ Packaged module; almost no waste on site
Budget	✕ Waste, rework and hidden costs	✓ Clear, predictable price per bathroom
Warranty	✕ Separate crews; responsibility is fragmented	✓ Single-source responsibility and warranty

ON SITE · CONVENTIONAL METHOD

Plaster and screed · Waterproofing · First-fix plumbing · Drain and fall · Tiling · Sanitaryware · Enclosure and furniture

FACTORY-BUILT · GRU-BATHROOM POD

Bathroom shipped in factory packaging, ready for plumbing connection. Reference project: Artea Başakşehir

Hotels and resorts
Standard room types, fast room handover

Residential
High-volume, repetitive wet rooms

Villas and private homes
Standard models from 5 units, custom production from 10 units

One system, three specification levels

A modular bathroom system available in three specification levels, differing in sanitaryware, fittings, finishes and equipment.

Basic Series
Project product range

1,850 €/m²*

- Function- and budget-focused
- High-volume projects
- Certified product range

Luxury Series
Luxury product range

2,150 €/m²*

- Balance of brand and design
- Hotel and residential projects
- Luxury product range

Premium Series
Premium-brand product range

2,400 €/m²*

- High-end material selection
- 5-star hotels and special projects
- Premium-brand high-end range

* The prices per m² shown are reference prices. The final price depends on brand selection, project scope, quantity, room type and specifications.

Aquacera (The ready-to-install tileable washbasin)

- Bathroom pod vanity and washbasin system
- Factory-made for easy on-site installation
- Any length, freestanding or wall-to-wall
- Waterproofed and fully tested

The membrane-covered body is finished with the tile or natural stone of your choice; the drain system is fully concealed.

80 cm – unlimited
Size options

min. 70 cm

Unlimited
Up to any length

From 70 cm to any length in 5 cm increments, it installs wall to wall without cutting. Its flexible design lets several washbasins be joined side by side, creating a wall-to-wall washbasin of unlimited length.

Product details

- Unlimited length from 80 cm
- Modular, adapts down to min. 70 cm
- Freestanding or wall-to-wall installation
- Factory-integrated waterproofing membrane

Why Aquacera?

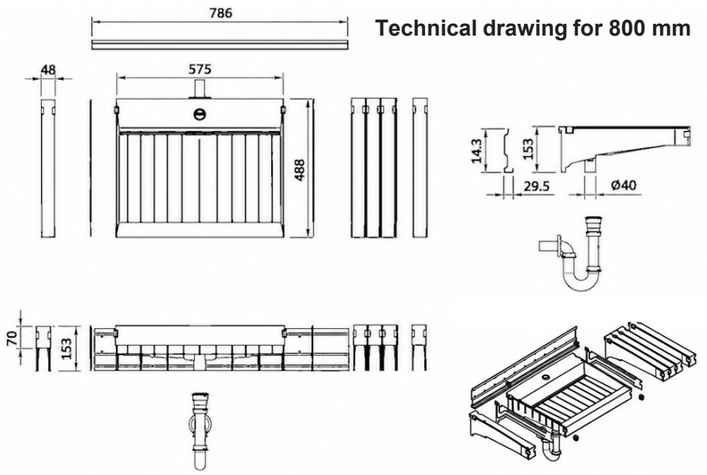

- Invisible drain, seamless surface
- You choose the tile: one surface with the rest of the bathroom
- Complete set, ready to install
- Patented design

LINEAR DRAIN

Tileline

A fully concealed shower channel whose grate is finished with the floor tile.

0.80 l/s
Drain capacity

60–100 mm
Installation height

60–160 cm
Length

Ideal for: Projects with large-format tile or natural stone where the floor should look uninterrupted.

GRUEN

Design and features

Cut to size

The channel can be shortened to a minimum of 40 cm.

Easy to clean

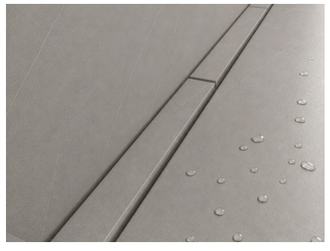

Remove the tiled access cover to clean the hair trap.

Product details

- 1.4301 (AISI 304) stainless steel channel body and grate
- Fully concealed, clean look
- Cut to size
- Pre-sloped one-piece body
- Suitable for tile and natural stone finishes
- Integrated waterproofing membrane
- Adjustable installation height 60–100 mm
- 360° rotatable outlet (horizontal and vertical)
- ø50 mm outlet diameter
- 25 mm water seal height
- Drain capacity 0.80 l/s

TECHNOLOGY PATENTED TECHNOLOGY

Fully concealed look

The floor finish continues uninterrupted over the drain.

Solid one-piece grate and channel body

Satin Anthracite; cut to length on site.

Why Tileline?

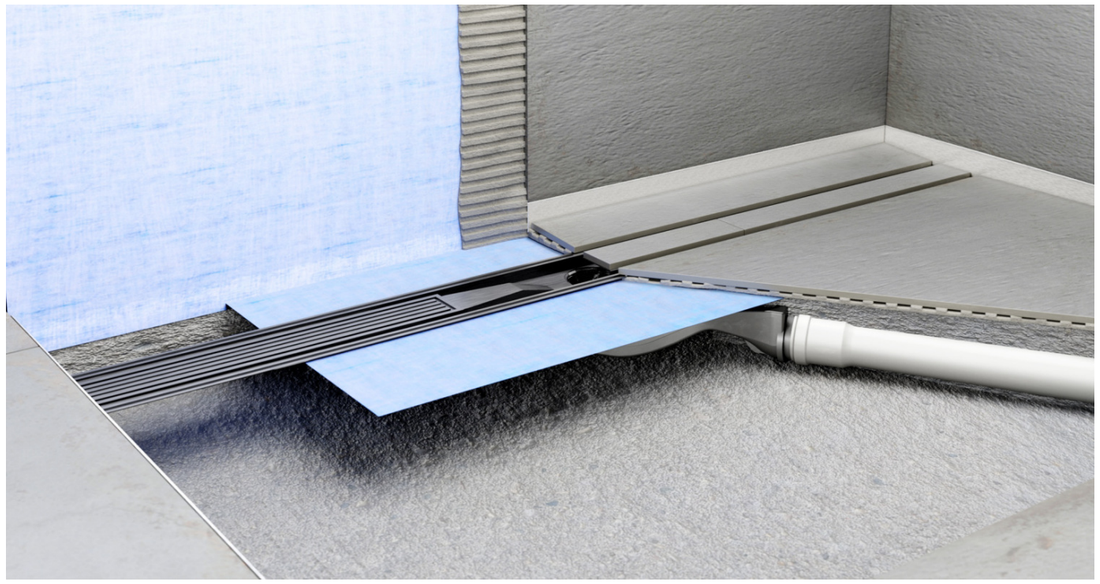

- The floor finish continues over the drain
- 60, 100 and 160 cm lengths
- Cut to size on site
- Removable access cover

Datasheet & Installation Guide

Cut to size
The channel can be shortened to a minimum of 40 cm.

Easy to clean
The hair trap lifts out easily, preventing blockages and ensuring hygiene.

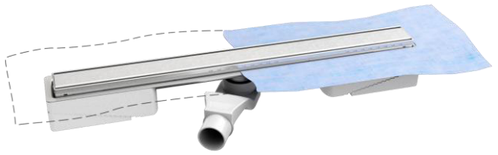

LINEAR DRAIN

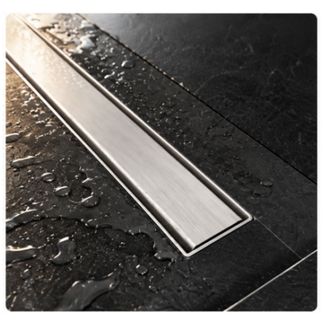

Proline

Engineering in every detail, perfection in every line.
With its stainless steel body and meticulously designed details, built for demanding professionals.

- 9 lengths from 30 to 120 cm
- Grate height adjusts to the finish thickness
- Stable installation with stepped feet
- Kiwa-certified fabric membrane bonded to the steel

Reversible grate: stainless steel or tile insert.

All siphons are made of high-quality PP and are self-cleaning.

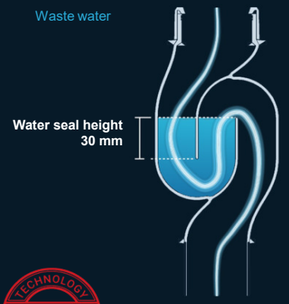

WATER SEAL. THE INVISIBLE BARRIER.

After every use, some water remains in the siphon. This water seal separates the bathroom from the drain line and keeps odours in the pipe.

HORIZONTAL OUTLET · SIPHON Y.8001

VERTICAL OUTLET · SIPHON Y.8002

1 WASTE WATER DRAINS
Water from the drain passes through the siphon into the DN 50 outlet.

2 WATER STAYS
Behind the weir, some water always remains: the water seal.

3 ODOURS STAY OUT
The water seal separates the bathroom from the drain line. The higher the water seal, the more secure the barrier.

MECHANICAL ODOUR TRAP · Y.8181

WHEN THE WATER SEAL DRIES OUT.

- In rarely used bathrooms, the water seal can evaporate over time.
- The mechanical odour trap then keeps blocking sewer odours.
- Optional insert for siphons Y.8001, SS.8082.v3 and SS.8081. Item no. Y.8181 (ø40).

Smart features and technical drawing

Smart features

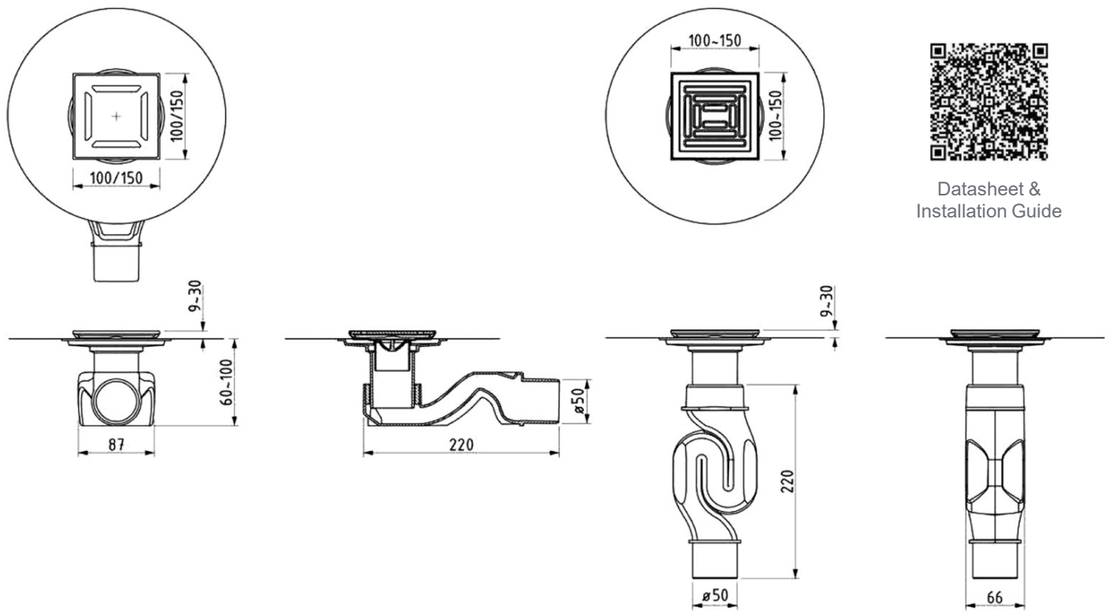

Horizontal-outlet siphon
Patented, specially designed shape.
The water flow reduces the build-up of dirt and debris inside.
Self-cleaning throughout its service life.

High-capacity, low-profile horizontal-outlet siphon
The 25 mm water seal height prevents odours escaping from the drain.
Its high drain capacity removes water quickly and efficiently.
Its patented self-cleaning shape reduces the build-up of hair and dirt.
The gasket built into the body **prevents leaks.**
Its minimal, compact design allows a low installation height.

Protective and leak-test cap
Protects the sealing collar during screeding.
Allows a **water leak test** at the plumbing connection.
After screeding, the cap is removed, turned over and refitted.
Keeps dirt and mortar out of the drain body during tiling.

Levelling clip
1 · 1.5 · 2 · 3 mm

Levelling wedge
Reusable

How does it work?

- Place the clip base under the tile edges
- Push the wedge in to level the tiles
- Once the adhesive has cured, snap off the clip

LMP.100 · Sloped profile

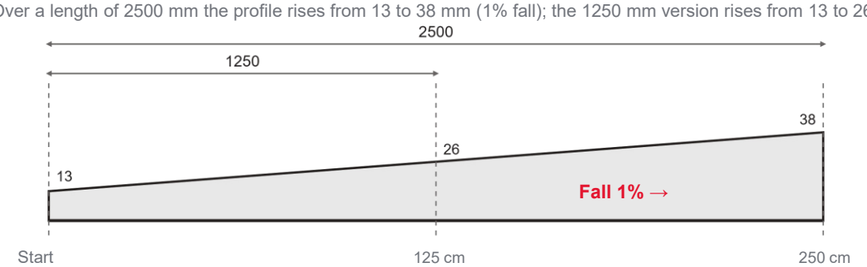

Available in left- and right-hand versions. Compensates for the height difference created by the 1% fall towards the drain in the shower area.
Shower area: LMP.L.100 on the left, LMP.R.100 on the right, LMP.121 non-sloped front edge profile opposite.
